FIG. 5 is a schematic diagram of a device 100, which includes a power source 18, a control unit 102, a sensor 104, and a display 106. The device 100 is configured to receive data from the sensor 104 and display the data on the display 106. The control unit 102 is configured to process the data received from the sensor 104 and generate a signal to the display 106. The power source 18 is configured to provide power to the control unit 102 and the display 106. The device 100 is further configured to receive data from the sensor 104 and display the data on the display 106. The control unit 102 is configured to process the data received from the sensor 104 and generate a signal to the display 106. The power source 18 is configured to provide power to the control unit 102 and the display 106.
